

TECH SHEET

HYBRID PEARL MILLET

- Extremely palatable forage for hay or grazing
- High leaf to stem ratio
- Drought tolerant and adapted to a wide range of soil types

Hybrid Pearl Millet is a versatile forage option with excellent yield potential. It will regrow following harvest more than other hay millet varieties, which allows it to be used in a multi-harvest haying or grazing system. Pearl Millet is suited to a range of growing conditions including droughty areas.

AGRONOMICS

BMR	No
Standability	5
Tillering & Regrowth	4
Harvest Method	Hay, Grazing
Days to Harvest	40-75
Seeding Depth	1/2-3/4 inch
Dryland Seeding Rate	10-12 lbs/acre
Irrigated Seeding Rate	12-15 lbs/acre

*40-50 days to first cut in a multi-cut system, 65-75 days to mid bloom single-cut harvest

*Agronomic Characteristics are rated on a 1 to 5 scale with 5 being the best
