

NATIVE MIXES

TECH SHEET

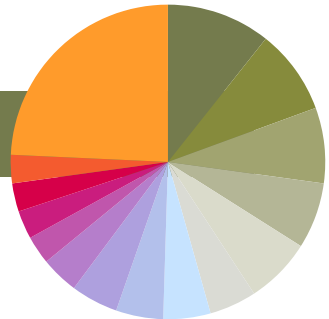

NATIVE WILDFLOWER MIX

Native Wildflower Mix is very diverse blend of native forbs that can either be seeded alone to create a focal point in any landscape, or as an addition to any of our grass mixes. We take color, bloom period, and height structure into account when designing this mix, maximizing visual appeal and pollinator attractiveness.

MIX RATIO

11% Black Eyed Susan
9% Plains Coreopsis
8% Evening Primrose
7% Prairie Coneflower
7% Western Yarrow
5% Lance-Leaved Coreopsis
5% Prairie Cinquefoil
5% Slender Penstemon
5% Wild Bergamot
4% Grayhead Coneflower
3% Blue Flax
3% Culver's Root
3% Hoary Vervain
3% Purple Prairie Clover
25% Others

None of the following exceed 2% of the Total Mixture Weight: Anise Hyssop, Blanketflower, Butterfly Milkweed, Canada Milkvetch, Common Milkweed, False Sunflower, Foxglove Beardtongue, Heath Aster, Illinois Bundleflower, Indian Blanket, Maximilian Sunflower, New England Aster, Partridge Pea, Prairie Blazingstar, Purple Coneflower, Purple Prairie Clover, Rocky Mountain Bee Plant, Showy Tick Trefoil, Smooth Blue Aster, Stiff Goldenrod, White Prairie Clover

Specialist Establishment Tip: In all native mixes, you often won't see a mature species during the first season. Weed management and upkeep should be the number one priority during the first year. To give this mix a boost a reduce erosion during establishment, we added QuickGard Sterile Triticale to the mix.

*These amounts are based on percentage of population
Comparable substitutions may be necessary depending on species availability

AGRONOMICS

Seeding Rate	5 lbs/acre
Seed per sq. ft.	47.4
Seeding Instructions	<ul style="list-style-type: none">• If broadcasting seed, multiply the seeding rate times 1.5• If used in a commercial application, multiply the seeding rate times 2
