

COOL-SEASON ANNUAL FORAGES

TECH SHEET

PEA/OAT

- Increase tonnage and quality in annual hay or haylage crops
- Reliable source of quality forage for all classes of livestock

Our 60/40 Pea/Oat blend is a commonly used spring forage option for livestock producers looking to increase tonnage and quality in their annual hay or haylage crops. Forage Peas are very high in digestibility and crude protein and do not sacrifice yield. Using a taller variety of oat in the blend ensures good dry matter yield and provides structure for the peas to grow upwards with. This combination makes Pea/Oat seed mix a reliable source of quality forage for all classes of livestock.

AGRONOMICS

Seeding Depth	1.5-2 inches
Seeding Rate	100 lbs/acre
Best Use	Chop
Quality	High
Maturity	Medium
