## ILLINOIS BUNDLEFLOWER

The self-pollinating, Illinois Bundleflower, is a herbaceous perennial forb. This native prairie legume is ideal for wildlife food and cover as its nutritious and fits many soil types. Illinois Bundleflower stands range from 2'-4' when mature. The flowers are rounded with a number of white seed pods shooting from the flower heads.

### AGRONOMICS

Light Requirements	Full
Bloom Period	July-August
Bloom Color	White
Mature Height	5 feet
Soil Moisture	Medium to Dry
Seeding Rate	15-20 lbs/acre
Package	1 lb, 5 lb
Planting Instructions	Site preparation is vital for allowing your seed to make clean contact with the soil, allowing for successful and uniform germination. Start with a clean, firm, weed-free seedbed to allow for uniform seed placement and an increased chance for faster establishment.
