

SINGLE SPECIES

TECH SHEET

ITALIAN RYEGRASS

Italian Ryegrass is an extremely high-quality cool season annual crop. It offers some of the highest feed quality and is a good fit where you need a multi-cut crop option. Use it for palatable livestock feed with adequate moisture and fertility. The average seeding rate is 25-30lbs per acre with adequate rainfall or irrigation, or 15-20lbs per acre in dryland situations.

AGRONOMICS

PLS Seeding Rate	20
Vegetative Height	2-4 feet
Package	50 lb bag, 50 lb bag Premium
