MAMMOTH RED CLOVER

Mammoth red clover is an annual red clover. It is most known for its forage production. It produces a robust volume of high quality forage in an annual hay crop. Mammoth red clover is also used in many cover crop mixes for its ability to fix nitrogen.

AGRONOMICS

	Cool Season Annual
Seed Count	250,000 seeds/lb
Seeding Rate	10 lbs/acre
Seeding Depth	1/4 inch
Planting Time	January-May/August-December
Bloom Color	Pink
Vegetative Height	24-26 inches
Package	50 lb bag
