MUNG BEANS

Mung beans are a warm season annual legume crop. They are a very fast growing, heat and drought tolerant plant. They are most commonly known for its grain production as a vegetable crop, but also work very well as a nitrogen fixer and biomass crop in cover crops and other annual forage crops.

AGRONOMICS

	Warm Season Annual
Seed Count	7,000 seeds/lb
Seeding Rate	25 lbs/acre
Seeding Depth	3/4 inch
Planting Time	Late May-Late July
Days to Maturity	80 days
Vegetative Height	24-30 inches
Package	50 lb bag
