## RAPESEED

Rapeseed is a robust, leafy annual brassica. It has a deep, branched root system that is excellent for reducing soil compaction. Rapeseed is used as a cover crop and annual forage, and can be grazed by livestock during the summer, fall, or winter. It provides good soil cover in the winter months, prevents soil erosion, suppresses weeds and improves soil tilth.

### AGRONOMICS

Seeding Rate	<b>Aerial or Surface:</b> 2.5-6 lbs/acre <b>Drilled:</b> 2-5 lbs/acre <b>Broadcasted:</b> 2.2-5.5 lbs/acre
Height	3-5 feet
Package	50 lb bag
