TECH SHEET

SWAMP MILKWEED

Swamp Milkweed is a perennial wildflower that has bright pink, purple and white attractive petals. Often used for wetland restoration, it grows best in neutral to slightly acidic soils in various soil types. Swamp Milkweed grows from 3' to 6' when mature.

AGRONOMICS

Light Requirements	Full, Partial
Bloom Period	June-August
Bloom Color	Pink
Mature Height	4 feet
Soil Moisture	Wet to Medium
Seeding Rate	15-20 lbs/acre
Package	1 lb, 5 lb
Planting Instructions	Site preparation is vital for allowing your seed to make clean contact with the soil, allowing for successful and uniform germination. Start with a clean, firm, weed-free seedbed to allow for uniform seed placement and an increased chance for faster establishment.
